The Methodist Church of New Zealand Te Hāhi Weteriana o Aotearoa is on a journey to ensure that all Our People ā Tātou Tāngata are cared for while undertaking their work and activities for the Church.

Ideally all our parishes and rohe should have in place easy, repeatable, common sense processes that prevent all foreseeable issues from occurring in our buildings and grounds.

Knowing where we are now with regards to basic health and safety will help us plan as a Church, what we need to do to positively move towards this ideal.

This survey is about setting the baseline of where we are now, and seeks opinions as to what the individual challenges are, and where best we could spend our connexional effort.

I strongly recommend each parish and rohe participate in this survey to help create this one complete baseline which will help us all move forward as one.

Health and safety is about planning together, not paperwork!

He waka ake noa! *We are all in this together!*

A handwritten signature in blue ink that reads 'Prince Devanandan'. The signature is stylized and includes a long horizontal flourish at the end.
