Work and Visitor Protocols

Ensure everyone coming onto the property is aware of the asbestos control plans that are put in place.

Contractors

Everyone carrying out any work in this building/s will be required to access and review any asbestos surveys and the asbestos management plan before undertaking any work.

This will be provided by the person/s responsible for managing asbestos or other relevant team member and will form part of the induction processes.

Where potential Asbestos containing materials are to be worked on, no work will take place until an appropriate method statement of work is produced and the Permit-to-Work procedures are authorised and implemented.

If you suspect asbestos is present, cease work and inform the Property Convenor or H&S Officer.

Emergency Services

Emergency Services attending site must be given access to the asbestos survey and management plan on arrival if their work involves interaction with the building/s.

Emergency Procedures

Follow these steps if an asbestos event occurs.

Where asbestos containing materials (ACMs) have been damaged, or damaged materials/suspected deterioration are identified during inspection processes, the Property Committee will instigate the emergency procedure below:

- Secure the affected area immediately ensuring no access is permitted (signage should be displayed and barriers erected where appropriate);
- Review impact on the building's operational procedures i.e. if a room is affected, alternative
 arrangements would need to be made as the room cannot be used;
- Contact the Connexional property team who can provide advice and guidance as necessary.
- Maintain controlled access to the area until such time as formal clearance has been confirmed; and
- Maintain good communication with all tenants and other relevant parties (including neighbours and others who may be in the immediate vicinity), providing updates as necessary to ensure the access arrangements are not breached.
